

The latest news on what's powering our neighborhoods

Energy efficiency starts with you! Celebrate National Energy Awareness Month with us by taking smart energy actions.

As we move into colder months and are spending more time indoors, we want you to know that you can make small changes and upgrades to make your home more comfortable. It's a good time to check your home for air leaks, seal gaps and tune-up your heating system to work more efficiently. If you've been thinking about bigger changes that have big-bill-savings, we have rebates for insulating your home, upgrading to a high-efficiency heating system, or replacing your water heater before it breaks.

Visit pse.com/rebates and take a smart energy action, use less energy and save on your bill.

Investing for a reliable and resilient grid

Providing safe, dependable and affordable electric service is our highest priority—and at the center of this is a modern grid.

We're using smart technology and investing in our infrastructure to ensure our grid is reliable, flexible and resilient. Distribution automation lets us detect outages and reroute power more quickly. We couple this technology with year-round maintenance to replace aging poles and keep our wires clear of falling tree branches. This means more efficient responses to outages and more customers staying connected.

Safety tip: Smell gas? Leave, then call 911 or PSE

Natural gas is lighter than air and will migrate to any available space. When combined with a certain amount of air, a natural gas leak can be ignited by the spark from flipping a light switch or even a doorbell, creating the risk of a fire or explosion. That's why it's so important to leave the area if you smell, hear or see signs of a natural gas leak. If you smell rotten eggs, hear a hissing noise or see bubbling in a puddle on the ground, leave the area then call 911 or PSE.
